
July 8, 2016

To whom it may concern,

Yelisey Moroz worked for our company as an English to Russian and Ukrainian interpreter on many occasions in 2013.

He provided interpreting services during several presentations of innovative water treatment and coal gasification solutions. He also participated in several business meetings of Siemens representatives with business partners.

We were very pleased with his interpreting services. He performed his work according to the highest professional standards. We are happy to recommend him for any project that requires deep engineering knowledge and excellent technical terminology skills.

Sincerely yours,

Sergey Dvornik
